WE PROVIDE A RELIABLE AND NON-STOP LABELING PROCESS

Our main goal is to provide an automatic 24/7 marking process, to make it non-stop and inexpensive. This is facilitated by the simplicity and reliability of our equipment, as well as warranty and post-warranty service.

- ✓ We are the only label printer applicator manufacturer in Russia.
- ✓ Simple design and maintenance.
Easy and fast replacement of spare parts.
- ✓ A well-developed partner network allows for prompt and high-quality work in the regions and outside Russia.
- ✓ We implement a maintenance "on a turn-key basis": we put into operation, carry out installation and commissioning works, warranty and post-warranty service. We provide a 12 months warranty.

We know the damage caused by malfunctions and downtime.
We do everything we can to make the manufacturing process continuous.

ADVANTAGES OF AUTOMATED MARKING

1

Cost reduction

Automation allows to increase the speed and accuracy of label application, reduce the number of production personnel.

2

Exclusion of the human factor

Error negligence, temporary absence of the employee, decrease in speed because of weariness, time for training increases the cost price of process.

3

Rapid readjustment of equipment

for the production of other products.

4

Possibility of individual marking

Introduction of obligatory marking demands the application of an individual label with a unique bar code which makes automation a necessity.

EQUIPMENT THAT WILL SIGNIFICANTLY INCREASE THE PROFITABILITY OF PRODUCTION

We produce label applicators for both individual and group packaging.

Our range of production equipment includes:

- Industrial label printer applicators
- Automatic label applicators
- Hardware and software complex for product accounting in the Unified State Automated Information System (EGAIS)

We are better off than the others!

Manufacturer's products, ease of maintenance and replacement of spare parts allow us to significantly reduce production costs and increase the profitability of production.

WE PRODUCE LABEL APPLICATORS WITH VARIOUS MODULES:

air-jet

piston

piston with swivel bracket

two-position piston

with corner module for corner labeling
